

SoftBreath Releases New Running Socks For Men

June 29, 2016

June 29, 2016 - PRESSADVANTAGE -

SoftBreath, a company that provides a number of running supplies, has released a new pair of men's running socks onto the Amazon marketplace. The socks are designed to offer higher quality than most found on the market today, according to a company spokesperson. "They're designed to not only offer high quality, but more comfort than what you typically get in running socks," states Patrick Shawn from SoftBreath.

They are no show socks, which means they don't go over the runner's shoes. The no-show running socks are made of 86 percent cotton, 10 percent polyester, 3 percent spandex, and 1 percent elastic, a combination that Shawn states makes them much more soft and breathable than others on the market. They are specifically designed to keep feet cool and dry throughout running or any strenuous exercise routine. Shawn says, "They won't ride down or slip on your feet while your exercising, which is the main reason that we believe they're the best on the market."

Shawn states that the spandex and elastic in the socks will keep them from slipping down and the low cut socks also feature a practical tab in the back that gives runners easy access to shift them when needed. The tab keeps the socks in place through hours of exercising or running, according to the company.

Shawn explains that running while wearing low quality socks can cause pain and blisters. He says that the socks from SoftBreath are specifically designed to keep feet dry while the wearer is exercising, which prevents blisters and otherwise helps to keep feet safe and healthy.

While the socks are packaged as men's, Shawn says that women can also use them. They are available in a pack of 3, and come in black. SoftBreath states that black is a color that goes with everything, so the socks will be the perfect match for any workout ensemble.

SoftBreath offers a 100 percent satisfaction guarantee, and a six month replacement policy to ensure complete satisfaction in their new product. Those interested in learning more can visit the Amazon marketplace to see the socks, as well as the official seller's page for SoftBreath, which lists other products that they currently have available.
