

Bakersfield Roofing Company Launches Solar Installation Services And New Website

June 29, 2016

June 29, 2016 - PRESSADVANTAGE -

BSW Roofing and Solar, a business in Bakersfield, CA, that previously focused on roofing services, has announced that they have launched a brand new website and have expanded their services to include solar installation. They want to point out that they have 70 years of experience in the roofing industry and now they also provide Bakersfield solar installation services. They have noted that more and more people are starting to see the benefits of renewable energy, and want to install solar panels on their roofs.

Ernie Montoya from BSW Roofing and Solar says: "BSW has been operating in the roofing industry for more than 70 years now, and we have always been committed to moving with the times. On entering 2016, we felt that this meant two things. Firstly, we needed to build a greater online presence, as the world has gone digital. Secondly, we needed to offer solar panels. We're so happy that we have achieved both our goals within the first half of this year."

The new website has been designed by Mobcastmedia.com. The website design company ensured that the site reflects the tremendous experience of the company, while also ensuring it is user friendly and easy to find through the search engines. Besides designing and launching the site, they have also been put in charge

of maintaining it.

The company is now fully certified to install solar panels on properties in the area, and they only work with the best solar panels Bakersfield residents expect to have. Specifically, they are an authorized SolarWorld installer, which is one of the most respected brands of panels in the country, if not the world. Achieving certification has been a great milestone for BSW.

"Through SolarWorld, we can offer our customers the best panels available today," adds Ernie Montoya. "Their performance is far superior to that of any other brand on the market, offering maximum energy production. Furthermore, they come with custom, quality installations each time and are fully guaranteed for 25 years, having gone through rigorous testing."

People looking for a solar power Bakersfield quote are encouraged to contact BSW as soon as possible. All quotes are completely free and no obligation, and the company sets itself apart by providing top quality products and services.
