LSM Heating Plumbing Electric Expands in Whatcom County With New Bellingham and Ferndale Offices

November 13, 2026

LYNDEN, WA - November 13, 2026 -
The company, known as Lynden Sheet Metal since 1940, took its new name in January and has launched a new website. LSM Heating Plumbing Electric, the Whatcom County contractor known as Lynden Sheet Metal since 1940, has opened offices in Bellingham and Ferndale over the past year, adding to its headquarters in Lynden. The growth follows the company?s name change on January 1 and the launch of a redesigned website at lyndensheetmetal.com this fall.

The new offices put LSM closer to homeowners and businesses in Bellingham and the Ferndale area. The company employs about 90 people and offers 24/7 emergency service for heating, cooling, plumbing, and commercial refrigeration.

The new name reflects the work the company does every day: heating and cooling, plumbing and electrical services for homes and businesses, as well as commercial refrigeration and custom metal fabrication. LSM began as a sheet metal shop in Lynden and added trades over the decades, most recently an electrical department in 2020. The owners, the staff, and the phone number are the same.

?We were Lynden Sheet Metal for more than 85 years, and we?re proud of that,? said Bobbi Kreider, President and CFO of LSM Heating Plumbing Electric. ?But a lot of people didn?t know we could also fix their plumbing or upgrade their electrical panel. The new name says what we do, and the new offices put us closer to the people we serve. The people who show up at your door, and the way we do business, haven?t changed.?

For homeowners, LSM also offers the HomeCare Plan, a preventive maintenance membership for heating and cooling equipment, water heaters, and gas fireplaces. Members receive one maintenance visit a year for each enrolled system, a free annual electrical panel scan, priority scheduling, repair discounts, and no overtime rates on qualifying emergency calls for enrolled equipment. Members also earn credit each year toward a future system replacement.

LSM sponsors local youth sports and school events and trains apprentices in the heating, plumbing, and electrical trades. More about the company?s community involvement is on its Giving Back page.

Homeowners and businesses can reach LSM at (360) 354-3991 or through the Contact Us page.

About LSM Heating Plumbing Electric

LSM Heating Plumbing Electric, formerly Lynden Sheet Metal, has served Whatcom County since 1940. The locally owned company provides heating, cooling, plumbing, and electrical services for homes and businesses, as well as commercial refrigeration and custom metal fabrication, from offices in Lynden, Bellingham, and Ferndale. LSM is licensed, bonded, and insured.
