LSM Heating Plumbing Electric Offers HomeCare Plan for Whatcom County Homeowners

November 13, 2026

LYNDEN, WA - November 13, 2026 -
LSM Heating Plumbing Electric, a locally owned contractor serving Whatcom County since 1940, offers the HomeCare Plan, a preventive maintenance membership for home heating and cooling equipment, water heaters and gas fireplaces. The plan is built around a yearly maintenance visit meant to catch small problems early and keep equipment running reliably.

The maintenance membership covers heating, cooling, and water heating equipment and includes a yearly electrical panel scan. Homeowners enroll the equipment they want covered: furnaces, heat pumps, air conditioners, ductless systems, gas fireplaces, shop or garage heaters, and water heaters. Each enrolled system receives one maintenance visit per year, which includes an inspection, a safety check, basic cleaning, performance testing, and a standard filter change.

Membership also includes a free electrical panel scan each year. LSM checks the panel with a thermal scan for hot spots that can indicate an overloaded circuit or a failing breaker, and provides the homeowner with a written summary of its findings.

Members are scheduled ahead of non-members whenever possible and pay no overtime rates on qualifying emergency calls for enrolled equipment, such as a complete loss of heat, cooling, or hot water. They receive $35 off repairs on enrolled equipment and 5% off upgrades and accessories such as air cleaners and humidifiers. Members also earn a $150 credit for each year of membership, up to $2,000, toward replacing their primary heating or cooling system, and the membership rate is locked for 12 months.

?A furnace or a water heater is easy to forget about until it quits,? said Bobbi Kreider, President and CFO of LSM Heating Plumbing Electric. ?HomeCare is our way of making sure somebody looks at it once a year, and of taking care of the customers who stick with us. We kept it simple: one visit a year for each piece of equipment, and real savings if something does need to be fixed.?

HomeCare is a maintenance membership, not a warranty or an insurance policy. Repairs and parts are billed separately, with member discounts applied. Homeowners can learn more on the HomeCare Plan page or enroll by calling (360) 354-3991.

About LSM Heating Plumbing Electric

LSM Heating Plumbing Electric, formerly Lynden Sheet Metal, has served Whatcom County since 1940. The locally owned company provides heating, cooling, plumbing, and electrical services for homes and businesses, as well as commercial refrigeration and custom metal fabrication, from offices in Lynden, Bellingham, and Ferndale. LSM is licensed, bonded, and insured.
