Nova Warranty Introduces Tiered Extended Car Warranty Coverage Across All Vehicle Types

November 18, 2026

WILMINGTON, DE - November 18, 2026 -
As factory warranties expire on a widening range of vehicles, from everyday sedans and hybrids to electric models, luxury sedans and exotic supercars, owners are facing growing repair costs with few coverage options designed for their specific situation. Nova Warranty has responded by structuring its vehicle service programs into tiered plans intended to work across Asian, American and European makes and models.

The timing of coverage decisions has become a particular concern for owners of certain vehicles. Tesla, for example, offers its Extended Service Agreement only during the initial four-year or 50,000-mile basic warranty period, which narrows the window in which some drivers can act. Nova Warranty addresses this variation by offering coverage for daily drivers, luxury cars, sports cars, vintage models, exotics, supercars, and electric and hybrid vehicles under the same tiered structure.

Nova Warranty offers two plans that allow owners to match protection to their vehicle and driving needs. The Nova Powertrain plan is the essential option, covering the engine, transmission, drive axle, electrical parts, cooling system and brakes. The Nova Superior plan is the comprehensive option, extending coverage to turbochargers, steering, suspension, air conditioning, fuel system and hi-tech electronics, along with all-wheel

drive, four-wheel drive and differential assembly. These flexible protection plans give owners a choice of coverage tier, the vehicle types included and the repair facility used.

Both plans include a 30-day money-back guarantee and 24-hour roadside assistance with towing, jump-starts and lockout service. Both also provide rental car reimbursement and trip interruption coverage, and coverage can transfer to a private buyer. Owners may use any dealership or ASE Certified Repair Facility for covered repairs, and the company publishes free quotes with no hidden fees.

"What we're seeing from drivers is that coverage which fits one owner often does not fit another," said a spokesperson for Nova Warranty. "A supercar owner, a commuter driving a sedan and someone moving into an electric vehicle each face different repair realities and different timelines once a factory warranty ends. The tiered structure exists so owners can align protection with the vehicle they actually drive."

The named makes covered span American brands including Chevrolet, GMC, Cadillac, Buick, Ford, Lincoln, Chrysler, Dodge and Jeep, alongside European and Asian brands such as Audi, BMW, Mercedes-Benz including AMG, Land Rover, Lotus, Maserati, McLaren, Ferrari, Rolls-Royce, Aston Martin, Lexus and Mazda. Tesla and other electric and hybrid vehicles are included as well.

"Owners increasingly want transparency about what is covered before the factory warranty runs out," the spokesperson added. "Providing clear tiers and a free quote lets people understand coverage on their own timeline rather than under pressure."

Prospective customers and those researching Nova Warranty reviews can learn more about the two plans at the company's website.

Nova Warranty specializes in vehicle service programs for automobiles across a broad range of makes and models, including luxury, exotic and electric vehicles. The company provides extended coverage options with roadside assistance, rental car reimbursement and transferable protection, serving owners seeking repair coverage after a manufacturer's warranty ends.
