

Gulf City Body & Trailer Works Highlights Expanded Truck Repair and Maintenance Services Across the Gulf Coast

November 20, 2026

Mobile, Alabama - November 20, 2026 -
Gulf City Body & Trailer Works, Inc. is drawing attention to its full-service truck repair and maintenance capabilities for fleet operators and independent drivers throughout the Gulf Coast region. The Mobile, Alabama facility continues to serve customers across communities including Fairhope, Daphne, New Orleans, Pensacola, and Destin as demand for reliable trailer and tanker servicing grows.

The company operates a repair facility that spans 10 acres with 50,000 square feet under roof, positioned adjacent to Interstate 10 approximately five miles east of the I-10 and I-65 connector. The location allows the facility to accommodate trailers, fuel tankers, and flatbeds from operators moving freight along the Gulf Coast corridor. Services include aluminum and stainless welding, steel fabrication, hydraulic work, wet line kit installation, truck equipment installation, and axle repair.

With more than 74 years of industry experience, the company maintains a team of trained mechanics who

regularly update their skills to work on modern trucks and trailers. The facility handles all makes and models and emphasizes completing each job correctly the first time. The company is a member of the National Truck Equipment Association, the National Tank Truck Carriers, and the Alabama, Mississippi, and Florida Petroleum Association.

"Keeping trucks and trailers on the road is essential for the businesses that depend on them, and that responsibility shapes how every job is approached," said Paul Averitt, General Manager of Gulf City Body & Trailer Works, Inc. "The team focuses on honest assessments and quality workmanship so that operators across Mobile, New Orleans, Pensacola, and the surrounding region can trust the work being done."

The facility also addresses the practical realities that fleet operators face when equipment is taken out of service. Downtime can disrupt delivery schedules and affect revenue, and the company structures its service process to return vehicles to operation efficiently. Appointments are available upon request to help customers plan around their operating schedules.

Beyond repair work, the company offers a range of new, used, and rental trailers from trusted partners along with other trucking equipment. It also stocks an inventory of national and brand name parts for trailers and tanks, allowing many service needs to be handled on site rather than waiting on outside suppliers.

"Experience across more than seven decades means familiarity with a wide variety of equipment and the issues that come with it," Averitt added. "That depth of knowledge helps customers from Fairhope to Destin get the truck repair and maintenance support they need without unnecessary delays."

Operators seeking trailer service, repair, maintenance, parts, or sales information can contact us today at 251-438-5521.
