About Jeannine Barcarse

Jeannine Barcarse is an internet marketing consultant who together with her partner works with business owners and entrepreneurs who don't really understand how to market themselves and their business. Further, they help them to understand the importance of leveraging someone else's time and expertise so that they can concentrate on the aspects of their business that really require their attention.

Via blog posts, videos, the occasional live presentation, and the often forgotten face-to-face conversation, she enjoys educating and sharing tips and tricks to help people learn how to market. She has had the pleasure of being picked up by The Los Angeles Daily News, San Jose Mercury News, and ABC.

When she is not concentrating on helping her fellow entrepreneurs, she can be found enjoying her latest find at Redbox with a bowl of homemade popcorn or a bowl of ice cream or curled up on the couch lost in Sudoku or Spider Solitaire.

Diego Valencia owns a Marketing Agency with his partner.

He is an Online Media Strategist, as well as, a Contributor Journalist for an Online Magazine and a co-host for an Online Radio Show. He works with Business Owners, Doctors, Speakers and Entrepreneurs who hate searching for themselves online only to find no one is talking about them, not enough people talk about them, or someone is talking bad about them. Based on the client, he creates service packages that apply specifically to that client.

He helps, trains and gives them the tools to turn a no star business into a 5 star business.

"In the year or so that I have known Jeannine Barcarse and Diego Valencia, I've come to discover that they care immensely about being great at what they do and helping clients be more successful as a result of working with them. I think they are creative, knowledgeable, and experts at solving small business technology problems and uncovering profitable opportunities. In fact, Jeannine and Diego are a great Online & Mobile Marketing team that can help any small business stay current with today's ever changing technology."

Craig A. Valine

When he is not helping local businesses you can find him riding his bike at Griffith Park racing his brother and friends up to the Observatory, spending time with his mom, killing zombies on his phone, or coming up with the invention of the week. He loves Lasagna, Paella, and Arepas.
