

Ontario HVAC Company Announces Free Air Conditioner For Customers

July 08, 2016

July 08, 2016 - PRESSADVANTAGE -

Consumers Comfort Inc, a company based in Vaughan, Ontario, Canada, has announced that they are now offering free air conditioners to customers who invest in high efficiency furnaces. The company states that the buyer only has to pay for the installation cost of the air conditioner, and that the promotion will run from June 1, 2016 until August 31, 2016.

Edgar Brown with Consumers Comfort Inc says, "We want our customers to be comfortable and to see how much we truly appreciate their business. With temperatures soaring this season, we felt that a free AC would be the perfect way to express both."

Brown states that in addition to the free air conditioner, customers can also get back as much as \$2250 in government rebates for having a high efficiency furnace and air conditioner installed in their homes. Customers in Ontario can currently enjoy up to \$650 in rebates from the Ontario Power Authority and \$1600 from Enbridge Gas. The Canadian government offers various rebates, grants, and tax credits to consumers

who choose to receive an energy audit from a certified Energy inspectors, which includes a pre-energy and post-energy audit that helps consumers assess upgrades and determine the final amount of their rebate.

"It's a great way to offset the overall cost of having a more energy efficient furnace installed, and the furnace itself can help you to save literally hundreds of dollars every year on your heating costs," Brown says.

Consumer Comfort offers a variety of heating and air conditioning services in Ontario, including HVAC services, system installations, and repair and maintenance services. In addition, the company provides water heaters and water purification systems.

Brown states that the company is choosing to provide customers with a free air conditioner as a means of convincing them that energy efficient furnaces are the way to go. Aside from the various rebates, he says that the energy cost savings alone will pay for the furnace over just a few short years, and that the free air conditioner is just icing on the cake.
