SoftBreath has announced the release of their new running tights on the Amazon marketplace. Patrick Shawn with SoftBreath says, "We're excited to finally have these available. They're quality tights that are sure to make running more comfortable. Furthermore, they can also be used for yoga and other fitness activities."

Shawn states that the tights are available in black and blue, and that they are constructed of 90 percent polyester and 10 percent spandex, to provide a comfortable fit and more flexibility than most other running tights. He says, "They are sure to pass your bend over test. They're designed for ultimate comfort, and we feel that they will always pass the test with flying colors."

The company states that the tights are designed to be durable, so they are suitable for running, yoga, general workouts, crossfit, and various other activities. The capri style, Shawn says, is very popular and offers even more flexibility than longer pant style tights.

Given the increase in the popularity of workouts and general physical fitness over the years, the company states that they have attempted to provide customers with products that will enable them to be more comfortable while reaching their fitness goals. Shawn states that their latest, the running tights, are just another way that they strive to provide the best in fitness and workout clothing and gear.

Several customers have already purchased the running tights and have provided reviews for the product. SoftBreath states that those interested in learning more or getting a firsthand account of how the tights fit and how they move can read through the various customer reviews for an unbiased opinion.

The company states that they offer only the highest in quality, and that these new tights are no exception. They say that the material is thick enough to provide support while running or exercising, but also breathable to make them more comfortable.

Those who are interested in learning more about the new tights from SoftBreath can visit the company's official seller's page on the Amazon marketplace, where a full list of their products can be found. The tights

are available in a range of sizes.
