

New Car Storage Company Opens In Perth

July 18, 2016

July 18, 2016 - PRESSADVANTAGE -

ABC Self Storage Perth has announced their official grand opening in Bibra Lake, Western Australia. The facility offers storage for cars, boats, and other larger items. Geoff Campbell, owner and operator of ABC Self Storage Perth says, "We're glad to be offering mass storage for customers. If you've got larger items that need to be stored, we've got the storage space for them."

Campbell explains that the facility is a safe and convenient alternative to storing cars, boats, trucks, and other larger items in yards or garages. He states that many people these days simply do not have the space to safely store antique cars, for instance, and that instead of leaving those cars exposed to the elements or taking up functional space in the garage, the company offers a better alternative. The storage containers are of warehouse size and style, working much like those that one would see on docks. The company states that this particular type of storage unit offers flexibility over those that are located inside a central building.

"Whether you've got a million dollar antique or just an old junker that you need for parts, you can store them in our facility, and we make it convenient for you to come and go, so you'll always have access to your vehicle," says Campbell.

The storage facility is providing short, medium, or long term leasing options, Campbell says, to make paying

convenient. They offer storage for vehicles as well as medium to large sized boats, and caravans. Campbell states that the terms offer flexibility so that those who do not need storage at various seasons of the year will not be charged. More about the storage facility can be seen on their website at abcsselfstorageperth.com.au/car-storage/.

The storage facility provides watertight storage to protect vehicles, Campbell says. In addition it offers security from theft, and protection from extreme weather. Campbell states that the facility will be serving all areas of Perth including Fremantle and the surrounding suburbs. Pricing for various units can be seen on the company's website, and more information about future services can be seen on their official FB page.
