September 01, 2016

September 01, 2016 - PRESSADVANTAGE -

Vanway Trophy & Award, Inc. has been recognized to as one of the leading providers of complete and exclusive range of trophies, plaques, medals, awards and more that come with latest designs and unbeatable prices. The company got the largest selections of awards and trophies available in the country and as one of the leader in awards industry serving people since 1971, Vanway Trophy & Award, Inc. is happy to meet the diverse awards needs of clients.

With an aim of serving the people more, the company will launch new pieces of equipment soon. The company has been preparing to launch new piece of equipment known as the UV printer. This equipment will allow full color graphics on different surfaces. This new equipment to be launched by the company will surely be a great help to ensure great colors and designs on awards, trophies, medals, promotional items and more.

Individuals looking for awards and trophies can visit the company online and browse the varieties of medals, awards, trophies and more that the site offers for different activities and even sports. There are huge selections to choose from like acrylics, crystals, plaques and many more products which are perfect for corporate awards, employee recognition, branding, sports and many other events.

Individuals looking for something else such as UV printer can also check out on the company's official website. It is through this site that they will launch and showcase their newest UV printer. This is a vital tool that will give way for creating the perfect and most beautifully designed awards suited for any event. This printer would also allow designing medals and other given surface with logos and plethora of different designs.

Launching this new UV printer indicates that designing and processing of awards and trophies will become easier and more manageable processes. This UV printer will surely function on its intended purposes to ensure that full colors and graphics will be printed on different surfaces. This simply means that better and more beautiful products will be mass produced.
