

More Than A Million Solar Panels Installed Nationwide

July 15, 2016

July 15, 2016 - PRESSADVANTAGE -

Solar Power Crew, a company in Prince George's County, Maryland that offers solar panel installation, has released information on why more than one million homeowners have already opted for solar power. Meanwhile, the company states that in light of so many consumers turning to solar power, they are offering financing for their panels that will assist in what many believe to be a high cost of installation.

Myles Jackson, owner of Solar Power Crew says, "People think that solar energy is an expensive investment. It's not, and the benefits have such long lasting rewards that it literally pays for itself in just a few years."

Jackson states that there are more than one million homeowners nationwide that have chosen to have solar panels installed, and that there are a number of benefits to doing so.

"People want to save money," Jackson says. "This is the best way to do so, and with the financing options we offer, you're saving even more, and helping to fit that solar energy perfectly into your budget."

Jackson says that more information about solar savings can be seen at www.savewithsolarpwr.com and that many homeowners do not realize how much they could be saving every year. He says that in addition to the monetary benefits of going solar, homeowners can help to protect the environment and the planet for future generations by limiting the amount of non-renewable energy sources that are used.

Solar energy is renewable and sustainable, which Jackson says is one of the main reasons homeowners choose it. He says that as long as there is sunlight, people will have energy, and that many environment conscious consumers are finally seeing that solar energy is something that the world needs to take advantage of. Regarding cost savings for homeowners, he states that those installing solar energy panels can expect to see their energy costs lowered by hundreds of dollars per year. He states that those choosing Solar Power Crew for their solar installation can take advantage of their loan program, which offers the benefits of a lease while providing the homeowner with the full benefits of owning the solar panels.

More about the company, and their no money down solar loan that can help homeowners in P.G. County

easily afford to have solar energy panels installed, can be seen on the company's official website at www.solarpowercrew.com.
