Soap.Club Launches Eight New Natural Soap Gift Sets

November 08, 2016

November 08, 2016 -
Soap.Club, a business in Vaughan, Ontario, Canada, is happy to announce that they have launched eight new natural soap gift sets on Amazon. The sets have been designed not just to leave the body clean and smelling delicious, but to look good as well. The company pointed out that natural soap has been observed to be beneficial for overall skin health and hygiene. Furthermore, it is also quickly becoming a popular gift.

Connie Farrar, spokesperson of Soap.Club, says: "There is an option to add flowers and chocolate during the holidays. Our 3 & 5 packs of natural soap gift sets are a unique natural product that everyone loves."

The company now has so many soap gift sets available that they have had to create specific categories to facilitate people finding what they need. As such, they now have natural gifts for natural people, spa day soaps, relax, recover and rejuvenate sets, and natural goat's milk soap, the purest and simplest of all their products. They have also made other categories available for easy browsing. Within each of these categories, Soap.Club has created different scents using only natural products.

Soap.Club is particularly proud of their women's and men's gift sets. These sets include five unique bars of soap. Each block of soap looks completely unique, with one looking like flowing water, one looking like oatmeal, and another looking like molten lava, for instance. "We wanted to create something that smells

good, feels good, and looks good," adds Connie Farrar. "We feel that we have achieved this in our natural gift sets, and we invite you to take a look yourself."

Their gifts for women pack includes eight different bars of soap. Each bar has a two tone color, which is off-white with pink, green, or purple. These represent the scents of plumeria, aloe, and tropical lavender. As such, they give users a tropical experience, allowing them to drift off during a spa-like experience.

All soaps are handmade and use natural ingredients. The company does not add any parabens, preservatives, animal products, petroleum, or sulfates to their products. They also only use non-GMO oils.
