

## **Southern Alabama Regional Council on Aging Selects FAMCare Case Management Software**

*July 19, 2016*

July 19, 2016 - PRESSADVANTAGE -

St. Louis, MO ? SARCOA, (Southern Alabama Regional Council on Aging), an Area Agency on Aging serving the seniors of Barbour, Coffee, Covington, Dale, Geneva, Henry and Houston counties of southeast Alabama has partnered with Global Vision Technologies, Inc. (GVT) to implement FAMCare case management software. The goal of FAMCare will be to help with structured information collection and analysis as the team works with the growing senior population to provide service which improve the quality of life and enhance the independence of the seniors in their area.

FAMCare, Rapid Case Management Software ? is GVT?s flagship software platform designed to streamline human services data management. FAMCare will enhance data collection, information management, and the strategic reporting needs of SARCOA.

?The Southern Alabama Regional Council on Aging (SARCOA) is the regional focal point for senior services in the Wiregrass area. We have 30 plus years? experience serving the growing senior population through the federal Older American?s Act and Social Security Act. We continually seek opportunities to better serve the rapidly growing senior population and look forward to utilizing our FAMCare Case Management Software to

do so. Our experience at SARCOA in combination with the experience that the GVT Team brings has proven invaluable in aiding us in continuing our mission," said, Joe Strickland, Director of Home and Community Services of SARCOA.

He continued, "It's exciting to work with an agency who has done so much great work for our aging population in Southeast Alabama. We're proud to work with Joe and his team as we build a great data and reporting infrastructure that will help them case manage, identify trends and improve outcomes for their vulnerable, aging population," said George Ritacco, Executive Director Client Services for GVT.
