

Status Transportation Releases Tire Safety Tips And Receives Positive Reviews

July 22, 2016

July 22, 2016 - PRESSADVANTAGE -

Status Transportation, a business in Winter Garden, FL, has recently released new information on tire safety tips, in an effort to lower the rates accidents due to faulty tires. Since then, the company has received an increasing number of positive reviews. The company explained that there was a need to release the information because the number of accidents caused by faulty tires is staggeringly high. Additionally, with summer having arrived, there has been a significant rise in these numbers as well because of truckers and other drivers not considering the impact of the hot weather on their tires.

Erik Chavez from Status Transportation says: "For us, making the roads a safer place is the ultimate goal. This is achieved by making sure that drivers are safe in their vehicles at all times. Tire safety is a particular area of concern every summer, so we have released a number of important tips to help people avoid serious accidents. We're very happy to see that this information has been appreciated."

In the Status Transportation Reviews, it is mentioned primarily that the service they provide is incredibly reliable and professional. "I was driving through Atlanta and ran into some issues with my truck," says Mister Pump on Google+. "Status got me back up and running and were very friendly to deal with." They have

received many recommendations for their reliable and professional service, but also for their clear aim of providing people with information to keep them safe.

The tire safety tips have been provided mainly for those in the trucking industry. That said, regular drivers are able to implement the same tips and tricks to increase their own safety as well. "It really isn't difficult to maintain proper safety," adds Erik Chavez. "It is about checking the proper tire inflation, making visual and tactile inspections, keeping wheels properly aligned, checking the tire tread depth, and checking the tread size. These simple checks will not only keep you safe on the road, they will also lower your fuel consumption, as an added bonus."

People are encouraged to contact Status Transportation for any repairs they require on their trucks. Furthermore, they are asked to follow their blog, where regular information is released pertaining to safety and more.
