WebMD.com is a website that features information on medical illnesses and conditions. Recently the website posted an article entitled "7 Tips For Psoriasis Skin Care," where it endeavored to provide treatment options for the condition of psoriasis. The Amazon vendor, OmniPharma, stated that their newest product Novella Advanced was a great treatment for psoriasis and dry skin.

The website WebMD.com claimed that "the itchy, inflamed skin that comes with psoriasis is treatable." Additionally they stated that "making simple tweaks to your daily routine can promote healing and calm flare-ups."

According to the website "a daily warm bath using a mild soap can help soothe itchy spots and remove dry skin." The soothing relief can be achieved with about fifteen minutes in warm water. Adding oil, finely ground oatmeal, Epsom salt, or Dead Sea salt to the bath can create an added comfort.

Additional psoriasis treatment options mentioned by the website included healing with sunlight, trying not to scratch and pick scaly skin which can result in sores and lowering stress and eating healthy. Stopping smoking and limiting alcohol use can reduce the incidence of flare-ups.

According to the website, the avoidance of lotions with alcohol and deodorant soaps can reduce the dryness of the skin and itchy spots associated with psoriasis. In addition, one of the most effective yet easiest thing persons can do for irritated skin is to keep it moist. WebMD.com recommended using a cream or ointment that would not be absorbed too easily.

A representative from OmniPharma commented, "our topical cream called Novella Advanced is an effective psoriasis treatment and reduces irritated skin. It can help to heal skin and reduce dryness, itching, redness, soreness, and scaling. It assists in keeping skin moist for day to day use which is important for skin care as referenced by WebMD."

The Novella Advanced topical cream from OmniPharma is made available on the Amazon marketplace at an affordable price. Customers can order in confidence because the psoriasis treatment cream comes with a 30-day money-back guarantee.
