

Electrical Accident Injures Worker, Prompting Comment From Personal Injury Lawyer

August 15, 2016

August 15, 2016 - PRESSADVANTAGE -

LipsigLawyers.com?s Thomas Moverman recently stated that he wishes a Kansas worker who was injured in an electrical accident a quick and successful recovery. Moverman added that these accidents are far too common in the construction industry and can many times end in a fatality.

A report from Lawrence Journal-World indicated that the worker had been driving a boom truck at the HERE Kansas construction site near Kansas University's Memorial Stadium when the boom truck being used to lift materials came too close to overhead power lines, shocking the man. He was transported to a nearby hospital and his condition was not immediately released.

The leading causes of private sector worker deaths in the construction industry for 2014 were falls, followed by electrocution, struck by an object, and caught-in/between, according to the Occupational Safety and Health Administration (OSHA). Additionally, the Bureau of Labor Statistics (BLS) stated that the "fatal four" were responsible for more than half of the construction worker deaths in 2014. According to the BLS, eliminating the fatal four would save 518 workers' lives in America every year.

Lipsig, Shapey, Manus & Moverman have been representing victims of construction accidents for years. In one case, Attorney Thomas Moverman won a victim \$2.6 million for a worker who injured his knee and back in a fall from defective scaffolding. The firm has successfully obtained millions in settlements for those victims and strongly believes in fighting for the compensation victims need and deserve. Lipsig, Shapey, Manus & Moverman is currently looking to assist those individuals who have been injured in a construction accident and qualifying individuals may be entitled to financial compensation.

?Most of these actions help to make our environment and the workplace safer so that others will not have to endure these painful losses,? said Moverman of the firm?s work.

For more information on construction injuries, or for a consultation, contact an attorney with Lipsig, Shapey, Manus & Moverman at (646)-846-4496.
