

California Company Launches New Medical Compression Socks

August 17, 2016

August 17, 2016 - PRESSADVANTAGE -

Wanderlust, a company based in Burlingame, California, has released a new pair of compression socks onto the Amazon marketplace. The company, which also offers compression sleeves for plantar fasciitis, states that their socks are designed to help customers with a variety of medical issues.

A spokesperson for the company says, "Our medical compression stockings are ideal for anyone who suffers from poor circulation in their legs and feet, as well as various other medical conditions."

According to various online medical resources, medical compression socks can help to improve blood flow and keep fluid from pooling in the legs. This in turn helps to prevent blood clots from forming, and can help to relieve symptoms of a number of problems including varicose veins, skin ulcers, and deep vein thrombosis, all of which can cause extreme pain and discomfort.

"We market our compression socks toward those with diagnosed medical conditions," says the spokesperson for Wanderlust. He adds, "But they can be worn by people with any number of issues that affect their legs and feet, particularly those who have to stand for long periods of time."

Medical experts recommend wearing compression socks everyday while awake to gain the most benefit. Specialty fitted socks are typically tight at the feet and gradually loosen as they travel up the leg. They have been noted to be effective in eliminating pain and swelling in patients with venous insufficiency as well as lymphedema, venous ulcers, and other circulation issues.

Wanderlust Compression Socks are currently available through the Amazon marketplace and the company offers a 100 percent money back guarantee on the stockings. Wanderlust states that their socks are constructed of true medical grade graduated compression to enable ease of use. The company states that their stockings are a good fit for anyone who must stand or sit for long periods of time and particularly those who suffer from edema, varicose veins, and other similar conditions.

Those interested in learning more about the compression socks can visit Wanderlust on their official Amazon seller's page, where a complete list of the products they offer can also be found.
