

# AC Insurance Services Highlights Boat Insurance Provisions

*August 22, 2016*

August 22, 2016 - PRESSADVANTAGE -

Boating season has started for many, and sales of boats has also gone up. As a result, there is now an increase in demand for boating insurance. AC Insurance Services, an insurance agency in West Palm Beach, FL, has recently made adjustments to their services for this kind of insurance, thereby making sure that people feel protected while they engage in boating activities.

Pete Steiner from AC Insurance Services says: "With our specialized boat insurance coverage, people can relax knowing that they have the coverage they need for their boat or personal watercraft. Our goal is to make this type of insurance easy to get, just as we do with all our other forms of insurance. We encourage everyone to contact us as soon as possible for a free, no obligation quotation."

The boat insurance offered by AC Insurance Services has a number of specialized features. They offer a range of different options to ensure people get the coverage that is relevant to them. This includes such things as roadside assistance, on water towing, total loss replacement, and more. The insurance agency

does not believe in one size fits all solutions, offering personalized, customizable solutions instead. This is something that has set them in very good standing with their many customers. "I researched all insurance company quotes for the best deal; and I found some great rates," says Scott S. on Facebook. "Peter Steiner beat them all from auto to property to commercial. I was so impressed with not only the rates but the customer service and the client contact."

The company understands how important it is that people shop around when it comes to choosing their policy. Finding the right type of insurance is vital to make sure coverage is appropriate as well. There are many different companies out there that offer boat insurance, particularly in South Florida, and AC Insurance Services wants to make sure people are provided with the information that they need in order to come to the right decision.

The agency currently provides insurance for all kinds of boats and personal water crafts, including pontoons, sailboats, house boats, fishing boats and much more. They encourage everyone to contact them through <http://myacis.com/contact/> for further information.
