

Call A Honey Do Launches Handyman Services In Dallas, Texas

August 22, 2016

August 22, 2016 - PRESSADVANTAGE -

Call a Honey Do has announced the expansion of their services to now include customers in the Dallas Fort Worth area. The company specializes in handyman services and residential remodeling. Stephen Holmes from Call a Honey Do says, "Everyone has a honey-do list. Our goal is to help you to get those items on your list done and out of the way."

Holmes says that the company can provide a number of home improvement services including installing home fixtures, such as ceiling fans and sinks, as well as faucets and other items. He says that when time is of the essence, the company is ready to move.

"You want those things done, but you want time to relax and enjoy life," says Holmes. "Our services are specifically designed to get your list of home repairs finished, while still allowing you time to play golf, take a drive; whatever it is that you would rather be doing."

Call a Honey Do offers home repair services for homeowners throughout the Dallas area, and states that they have years of experience and expertise in their fields. Their website, which can be seen at

<http://callahoneydo.com>, offers a list of the specific services that they will be providing in Dallas, along with tips for hiring a handyman and reasons why most households need one.

The company states that while there are a number of homeowners who can handle typical jobs like changing locks and various other small tasks, most prefer to hire professionals when it comes to more complicated home repairs, to ensure that they get the jobs done properly. Holmes states that some homeowners begin their own home improvement projects and realize that they are not equipped to handle the repairs. He says that's when they should call in a professional with experience in these specific types of services.

Call a Honey Do states that their new Dallas services are affordable and that they cover a wide range of home improvements. The company urges homeowners who have a honey-do list but don't have the time to tackle them to contact them to schedule a consultation.
