

## **Kratomystic Now Offers Kratom Online**

*September 01, 2016*

September 01, 2016 -

Kratomystic, a business in San Diego, CA, has announced that kratom is now available online. Kratom is an increasingly popular natural product that can be used as a stimulant, sedative, pain killer, diarrhea medicine, and even as a treatment for those with an opiate addiction. It is a controversial product, however, as some have also used it as a recreational drug. As a result, companies that wish to sell kratom have to go through various tests and undertake complex agreements in order to be able to do so, something that Kratomystic has now completed.

A representative from Kratomystic says: "Kratom is a botanical product that has been used in Oriental medicine for thousands of years, and continues to be used today. It has been found to have a wealth of health benefits and we believe people here are being denied such benefits. Just because they are not made by the big pharmas doesn't mean we shouldn't be able to have access to it. We have gone through all the necessary registration and regulation procedures in order to be able to offer kratom online now, so people no longer have to miss out."

Kratomystic points out that kratom has a number of scientifically proven health benefits. Some of these include pain relief, boosting of the immune system, lifting up of energy levels, functioning as a sexual stimulant, ability to help with anxiety and mood swings, help with addiction recovery, improvement of heart

health, and ability to fight diabetes. It is pointed out that in Thailand, some 70% of the adult population chews kratom leaves everyday, and the health profile of Thai people is far better than that in most developed countries.

"The Thai know how good kratom is for them," adds the representative. "This is why so many Thai people have the right body weight, lustrous hair, and beautiful skin. Incidences of diabetes and heart disease are also much lower. Furthermore, people have a far better state of mental health in Thailand. We, and many others like us, believe that this is all thanks to the kratom leaves, and we're delighted to be able to offer it on the market here as well."
