

Roy Wingate Publishes Houston Pool Video

August 26, 2016

August 26, 2016 - PRESSADVANTAGE -

Roy Wingate Business Consultants, which is a consultancy company in Odessa, TX, has revealed that they have recently completed a large piece of work for a new client, Houston Custom Pool Contractors. As part of their work with this pool construction company, they have created and now published a new Houston pool video. The video has only been very recently published and it is available at <https://www.youtube.com/watch?v=Zan9Prhi0Ms>.

"Working with Houston Custom Pool Contractors has been a blast," says Roy Wingate himself. "I personally love pools, so working with this particular company has been really enjoyable. One of the things that I also found so enjoyable is that they wanted a website that would not only get them more clients, obviously, but they also wanted to provide people with information so that they are able to make the right decision for their pool needs. We have incorporated this in their website, and also in the new video that we have published, which we are all very happy with."

In the video, people are provided with three tips to make their own backyard awesome. The start of the video highlights some of the work that Houston Custom Pool Contractors can do, including decking, outdoor kitchens, fences, pools, fire pits, and more. However, the importance of providing information above all else is very evident from the video in the section that discusses the three important tips.

"Our client explained to us how people can create the backyard of their dreams," adds Roy Wingate. "This includes determining the space that is available to use, finding out what rules exist in the neighborhood and community, and talking to a reputable construction expert. Obviously, this is where our client comes in."

Houston Custom Pool Contractors, meanwhile, is an outdoor construction expert. They want to help people turn their gardens and backyards into a personal holiday destination. They offer free, no obligation quotes and estimates and encourage everyone to watch their video and explore their website for important tips and information on things to think about before engaging in a large scale construction project.
