

South Florida Alcohol Rehabilitation Center Improves Communities

October 11, 2016

October 11, 2016 - PRESSADVANTAGE -

Chapters Recovery, which is based in Delray Beach, FL, is improving communities through their alcohol rehabilitation treatment programs. Alcohol addiction affects all levels of society, and the work Chapters Recovery does has a positive impact on all those different levels. Full details about the work that they do are available at <http://chaptersrecovery.com/alcohol-rehabilitation-center/>.

A representative from Chapters Recovery says: "We offer a range of different forms of alcohol treatment. We understand that every client is unique, with a unique story and unique requirements, and we are committed to making sure they can receive treatment that works for them. This includes inpatient and outpatient treatment, as well as family therapy to help rebuild support networks."

The treatment that Chapters Recovery offers combine the philosophy of Alcoholics Anonymous (AA) with proven medical strategies and therapies. This is offered in a safe, controlled environment where people are protected from the influences of alcohol.

While under treatment, patients can receive detox, cognitive behavior therapy, and group therapy. While based on proven programs such as those of the AA, the center also incorporates other philosophies in order to motivate the patients to regain control over their own lives. While this starts with a period of detox, the treatment that patients receive afterwards is often even more important.

"When patients come to us, we first help them through a period of medically supervised detox, which is done off site," adds the representative. "After detox, we offer rehab treatment in a range of different ways. These include partial hospitalization, medical outpatient detox, cognitive behavioral therapy, intensive outpatient programs, dialectical behavioral therapy, motivational interviewing, outpatient services, group therapy, the 12 step program, AA support groups, narcotics anonymous, and family and individual therapy."

Chapters Recovery is fully JCAHO accredited to deliver their services. They offer both drug and alcohol treatment options, focusing on helping people at any point of addiction or recovery. Because addictions affect

every element of a community, the work that they do has helped improve the lives not just of the recovering patients, but also of everybody else in the community, something for which the rehab center is greatly respected.
