

## **The Diamond Group Helps People Set Up Individual Pension Income For Retirement**

*September 08, 2016*

September 08, 2016 - PRESSADVANTAGE -

The Diamond Group, a nationally recognized firm based in Forest Lake, MN, helps people build their financial future, wants to inform retirees that many can now have their own personal pension for retirement income. The company has a number of products and services in place to help people achieve this, including their Individual Pension by Design program which has been shown to be popular. More details are available at <http://www.thediamondgroup.co/>.

Alan Schmidt from The Diamond Group says: "Perhaps, like many residents in and around the Forest Lake area, you think that you are not yet ready for retirement because it's a drastic change in your life. Maybe you believe Social Security is your only option for retirement income, and you're not even sure when to start taking it. Or you fear outliving your savings. We can help address these concerns."

According to a study by the RAND Corporation for the U.S. Department of Labor, people who strategize for a successful retirement income plan have healthier financial futures and a greater peace of mind. The Diamond Group is capable of helping people build a better future through substantive retirement planning.

Alan adds: "It is often said that the joy is found in the journey, not the destination. However, that is only the case if your journey leads you safely to your destination. By choosing the right mix of guarantees, liquidity, and growth, you can be well on your way to a safe and rewarding trip towards retirement."

Consulting with a highly qualified professional like Mr. Schmidt can help people get the most out of their assets. The Diamond Group can help individuals achieve financial dignity. This is because their work focuses on helping people live their lives with financial security. Alan wants to make people understand the important role that income plays in providing them with retirement security.

There are multiple studies citing that pre- and post-retirees' biggest fears are running out of money during retirement or outliving their retirement savings. Alan points out that they can provide people with all the tools they need to live an optimal retirement. "Optimal doesn't mean best," he explains. "Nobody has a crystal ball and nobody knows what the best will be. If the Dow Jones soars to 50,000 in the next 10 years, everyone should have put their money in those 30 companies. Optimal means the best more often and will never be the worst. We need to use that strategy when it comes to retirement."
