

The ProMedia Group Celebrates 7 Year Anniversary of Being in Business

September 13, 2016

Tampa, Florida - September 13, 2016 -
The ProMedia Group, an audio visual consultant and installation service primarily based in Florida, is celebrating its 7 year anniversary of being in business. Having provided supreme quality audio visual services including High Definition video conferencing, conference room design, as well as installation and digital signage throughout the last 7 years, the company looks set to build further upon its pristine reputation and keep taking things forward.

At its core, the company is a leading single-source provider of a multitude of communicative solutions, which include high definition video conferencing, audiovisual, and networked solutions. However, unlike other brands in the industry, the ProMedia Group takes the initiative to provide all the help they can to their clients. This includes guiding the client through every step of the process, from consultancy, to design, to integration and training.

This personalized form of service, largely missing throughout the industry, definitely seems to be working its charms, as the company?s impressive portfolio includes several household names as it continues to develop with even more remarkable additions on a routine basis. Apart from that, the company is also associated with

some of the biggest names in the audiovisual product market. Connected to an exclusive group of professional AV solution manufacturers, the ProMedia Group only deals with the latest technology. The company?s partners include Altona, Sharp, Symetrix, Clickshare, Polycom, Brightsign, and Cambridge.

During a recent interview, the spokesperson of the company, Ken Avis, touched upon the vision that is significantly essential for each member of the ProMedia team. ?Obviously there?s a vision behind every firm that drives the company forward; and the same is the case with us,? said Mr. Avis. He further added, ?With collective experience of almost 30 years, the ProMedia Group was founded on the mission of building superior customer video communications. This is one thing that will always remain a core component of our vision.?

Despite the fact that the company has already been able to establish an impressive network of branches which runs through Tampa Florida, Atlanta Georgia, and Sarasota Florida, the ProMedia Group continues to expand locations and services. The main focus remains to be the same as it was 7 years back when the audio visual consultants and installers made their way into the industry, which is to utilize the latest technology in order to help modern businesses communicate effectively.
