

Virtual Drone Tour gives Golfers a Taste of Beacon Hall

September 14, 2016

September 14, 2016 - PRESSADVANTAGE -

Beacon Hall would like to invite golfers to experience Beacon Hall through a drone video tour of the golf course. By giving a hole-by-hole tour, this video highlights Beacon Hall as a beautiful, challenging, and enjoyable golf course that is geared toward experienced players. With the increase in drone uses, this is a great example of how drone footage can be utilized effectively by businesses to connect with customers and market their services and offerings.

Phil Hardy, the Membership Director at Beacon Hall, narrates the drone video tour, taking golfer?s through the course, explaining what to pay attention to on each hole. He not only explains the nature of the course but also gives golfers a breakdown of how to approach the whole during play. As a current video featuring the course during 2016, this is an updated view of the course as of the end of this season. This gives golfers a great opportunity to witness what Beacon Hall has to offer in preparation for next season.

This fourteen and a half minute video gives golfers a detailed look at the Beacon Hall course, including the quality, difficulty, and magnificence of the course. This hole-by-hole tour gives veteran and prospective Beacon Hall golfers an aerial view of the course, allowing them to see the landscape, style, and evaluate difficulty. This also gives more experienced golfers the opportunity to examine the course ahead of play, giving them an idea of what to expect. This video allows golfers to preview the course, prepare for play, and

explore what Beacon Hall has to offer them. More than that, this video shows prospective golfers what to expect from Beacon Hall and why they should try it out.
