

Wpulti.net Releases List Where Animal Lovers Can Choose Their Premium WordPress Theme

May 26, 2015

May 26, 2015 - PRESSADVANTAGE -

Wpulti.net, a company based in Brockville, Dunedin, New Zealand, has released a list of what they believe to be 20 Premium WordPress themes for animal lovers. Wpulti is a company that offers web design services, of which WordPress is hugely important. They hope that their Premium WordPress Theme list will help others get more out of their design.

"WordPress is ingrained in the world of blogs and websites nowadays," says Yuzuru Ishikawa from Wpulti.net. "Indeed, even people who want to set up their own sites without our help can use it. To support these people in particular, we have created a list of the 20 Top animal themed portfolio WordPress themes. Using these themes will immediately set someone's site apart, which is exactly what they want to achieve" adds Yuzuru Ishikawa.

Wpulti explains to users why these types of themes can be of benefit to them. Naturally, they are a firm favorite for pet store owners, as these can use the themes to create a more uniform look for their sites and thereby not just attract more traffic but also convert a substantial portion of these into sales as well. The themes are also popular with veterinarian services, who want to create a look that is caring, welcoming and

empathic, while appearing professional at the same time. Finally, the themes are particularly enjoyed by those who simply want to blog or share information about pets. Pets make for a very popular online subject, and standing out from such a huge crowd means that blog owners have to do something special.

"A quick search for pet-related websites reveals thousands of results, the vast majority of which are powered by WordPress," adds Yuzuru Ishikawa. "The number of those that use a theme that is totally unrelated to the subject of the site is unreal. Doing something as simple as using a pet related theme for a pet website is all it takes to get noticed."

Some of the themes that were mentioned in the top 20 list include the Sweet Puppy Responsive WordPress Theme, the Sea World Responsive WordPress Theme and the Furry Tabby Responsive WordPress Theme. Each of these focuses on a different type of animal. Additionally, these are responsive themes. This means that they will work across a range of different devices, including mobile tablets and smartphones. Being responsive is now vital in terms of getting a high page ranking on Google, who have recently released a new update, dubbed "Mobilegeddon", as it affected websites that were not responsive.

It should be pointed out, however, that Wpulti does not focus specifically on pet websites for their services. Indeed, they work across the full spectrum of websites, from businesses to news outlets to personal blogs. They provide a range of pieces of information for people who want to get the most out of their site, including advice on using a news WordPress theme, for instance.
