

Review Examining Michael Tyrrell's Music Product Released

May 18, 2015

May 18, 2015 - PRESSADVANTAGE -

Wholetones claims to affect the mind and body positively and is for anyone who wants to experience better health. This has caught the attention of HealthyandFitZone.com's Stan Stevenson, prompting an investigative review.

Our Wholetones review shows that these are healing frequencies embedded into calming songs. Michael believes that one of the frequencies he is using in the music was passed on by God to King David who was known for his music in biblical times, reports Stevenson. David played in a different key from his fellow harp players, which he believes is 444 hertz, and his music helped to promote peace and restoration. The healing effects that are known to accompany binaural beats and their frequencies are what will be of benefit here.

Wholetones includes 7 songs with different frequencies ranging from 396 Hz to 852 Hz that are beneficial for healing during troubling emotional or spiritual times, stress reduction, cellular health and body functions, developing emotions such as forgiveness and help support good organ function, energy and creativity, digestion, immune health and good overall health. People also get a 91-page book called "Wholetones: The Sound of Healing", which can help them discover and unlock their hidden potential. It explains the frequencies and how to make the most out of the songs.

All you have to do is listen to music for better health, to increase your energy and to experience a host of physical benefits such as balanced metabolism, improved digestion, increased productivity and creativity, elimination of pain and freedom from addiction. If you are a musician, you can learn how to play in the healing frequencies, says Stevenson. There are tons of positive reviews about the power that this music and frequencies available on digital tracks or CD have. Experience a host of relationship benefits, such as forgiveness, awareness and love.

Wholetones are simply beautiful songs at frequencies that are known to heal, promote well-being and encourage a healthier body and mind. If you listen to the samples, it is easy to see that they have an effect on

you, and whether you choose to listen to them as you are relaxing or in times of need, they will help align you with a powerful and beneficial frequency. Hear and feel the music, and let your opinions fall to the side as you embrace the healing power that these songs are proven to have on many different people.?
