Conference Center In Battle Ground, WA, Launches New Website

November 02, 2016

November 02, 2016 -

Conference centers across the country are becoming increasingly accessible online. Center Point, a conference center in Battle Ground, WA, has proudly announced that their new website went live on September 1, 2016. This website highlights the various services that the conference center offers, the types of rooms they have available, and how customers can make a booking. The new website is already proving to be quite popular.

Rochelle Unger from Center Point says: "Our center has been running for a very long time and, for that time, we have mainly relied on word of mouth advertising. While we did have a rudimentary website in the past, it wasn't really fit for purpose. We felt that it was about time that we have a more effective way of showing online what we do and the result is this beautiful new website. Not only is it beautiful, it is also fully functional, meaning people can find out exactly what we are all about."

Center Point offers three primary services. First of all, they offer an event space, which includes two conference rooms and a banquet room. The latter has enough space for 160 people, and the conference rooms can accommodate between 25 and 75 people depending on the setup. They also offer 5,700 square

feet of office space, which can be individually leased, or that can be modified for those who require larger spaces with reception areas.

The final service that Center Point offers focuses on community services. At the center, a number of classes are offered to the community on important subjects and topics. These include automotive care and healthful living, to name but a few. Rochelle Unger adds: "We really love our community efforts, ensuring people in the Battle Ground area can access high quality training and experience in functional and practical skills. It is our way to give back to the community, and we really encourage anyone to check our website to find out what sort of projects are currently running."

As part of their new website, Center Point has also launched their social media campaign. At present, this extends mainly to Yelp. They have requested that those who have used their services leave them a review.
