## **El Cajon House Cleaning Company Launches New Website**

*October 03, 2016*

October 03, 2016 - PRESSADVANTAGE -

East County Cleaning Services is a company based in El Cajon, California, that provides residential and commercial cleaning services throughout El Cajon and San Diego's East County. The company has announced recently that their new website has just been launched.

The family owned and operated business has been providing cleaning services in the local area for more than eight years. Charles Vasquez, owner of the company, says that they felt the time was finally right to offer online access for customers in San Diego County.

"We have cherished every moment of our time in this area," Vasquez says. "Our goal is and has always been to offer quality services to our customers. We feel that having a website that outlines our services and service areas, and gives customers another method of contact, will help us to serve you better."

The site, which can be accessed at [www.eastcountycleaningservices.com](http://www.eastcountycleaningservices.com), gives a general overview of what the company offers and the types of customers they have worked with in the past. Among their housekeeping services, they also provide janitorial, spring cleaning, and a variety of office and commercial cleaning

services. Vasquez states that the company's rates are set at fair market price, and that they offer affordable cleaning for homes, motels, industrial businesses, and more.

"We just want everyone to be able to see the long list of cleaning services that we provide," says Vasquez. "And we want them to be able to look at our history, our mission, and judge for themselves if they feel that we are the best team to handle all of their cleaning jobs."

The company states that they are not a company that subcontracts any of their jobs. Vasquez says that they control their operation themselves on a local level, and only hire local employees. He says that it is this commitment to community that has kept them in business for so many years, and that he hopes area home and business owners will visit them on their new website to get more information. The company has also set up a Twitter account that customers can access for more information.
