La Mesa Plumber Announces 24 Hour Emergency Services

October 06, 2016

October 06, 2016 -
La Mesa Plumber has recently announced that they are now offering 24 hour emergency plumbing services for customers in the La Mesa, California area. The company provides a range of plumbing services for residential and commercial clientele and announced that they will now provide around the clock care for certain plumbing emergencies.

Joseph Williams with the plumbing company states, "We realize that plumbing problems are not something that you can typically plan for, nor can you put off repairs until normal business hours. Our goal is to ensure that our customers get the service that they need when they need it most."

The company provides a list of available plumbing services on their official website, which also offers details regarding the new 24 hour emergency services. Williams states that there are a number of things that could qualify as an emergency, from clogged toilets to busted pipes, and that the company will have someone standing by to answer calls quickly to ensure customers receive the fastest response possible.

"We understand that customers want to be sure that someone is available," says Williams. "Putting off certain

plumbing repairs could lead to massive damage to your home or business, damage that could be very expensive to repair."

Williams states that leaky pipes and other plumbing issues could easily lead to wall, floor, and ceiling damage as water builds up in those places. He states that the reasoning behind these new around the clock hours is to help customers avoid what could potentially be very costly repairs due to a number of plumbing problems.

The company says that interested customers can follow and even contact them in the event of an emergency through their official Twitter page. Those in need of emergency repairs can also reach out to the company directly by phone or email.

Williams states that he hopes customers will keep the company in mind when they are faced with emergency issues. He says that the entire team at La Mesa Plumber is glad to offer assistance in any capacity. More about the range of services that the company offers, as well as contact information for emergency situations, can be found on their site at http://lamesacaplumber.com.
