

Solar Dealer First To Offer Apollo Tile II Roof System In Bakersfield

October 05, 2016

October 05, 2016 - PRESSADVANTAGE -

BSW Roofing and Solar, a business in Bakersfield, CA, is proud to announce that they are the only Bakersfield solar dealer to sell the new Apollo Tile II roof system. The new system is unique because it is both a solar panel and a roof tile in one. It makes use of highly efficient silicon solar cells to capture as much solar energy as possible while blending with the surrounding tiles, which has the advantage of a roof that looks better aesthetically compared to the usual roof-mounted solar power system.

Ernie Montoya from BSW Roofing and Solar says: "The Apollo Tile II system is the most technologically advanced system in the market today. It is highly efficient, using monocrystalline silicon cells, which enables it to capture the highest energy per square foot on the market. But what really sets it apart is that it blends in with the roof perfectly, because it is also a roof tile. We're the only ones in the area to offer this system."

When it comes to solar Bakersfield is ideally placed for people to generate their own clean energy. The climate is perfect for it, which means some people can even generate as much as 100% of their energy requirement. This is particularly true with the new Apollo II tiles, with many people generating far more than they use themselves, which they then sell back to the grid.

Those who have used the company's services in the past have been very pleased with the results they have been able to experience. "Love this business and their team," says Gina M. on Facebook. "I have learned so much from them about solar and roofing. They have been patient with all of my questions and I know as soon as I'm ready they will be receiving a call from me to get started. Take time to educate yourself before making such a big investment. They have wonderful videos in the video section of this page letting you know what to ask for and what to expect from your solar company."

Those interested in the new solar roofing tile are encouraged to contact the company as soon as possible.
