

Nufabrx Announces Discount Pricing For Multiple Purchases Of Nufabrx Pillowcase

June 09, 2015

June 09, 2015 - PRESSADVANTAGE -

Due to increased demand, Nufabrx has recently announced a new pricing structure that allows for discounts when purchasing multiple quantities of their Nufabrx Pillowcase. While a single essential oil pillowcase can be purchased for \$29.99, they have now added several packages for customers who want to take advantage of significant discounts. Packages include a Laundry Day 2-Pack for \$53.99, College Bound 4-Pack for \$101.99, Full House 5-Pack for \$119.99 and the Village 10-Pack for \$224.99.

The pillowcase, which is made using innovative nano-encapsulation technology, embeds an all-natural, scientifically formulated serum into its bamboo fibers. Company representatives state that the technology allows for the pillowcase to release a mix of lavender, lemon balm, tea tree oil, and wintergreen oil onto the skin as the user sleeps. The pressure and heat of the body breaks down the walls of the nanocapsules for a controlled release of the serum.

Nufabrx and its users state that there are many benefits to using the Nufabrx Pillowcase. Aside from the fact

that it may fight blemishes during sleep, it may be more comfortable and can give the user a better night's rest. The pillowcase is made with a 220-thread count of bamboo fibers, making it ultrasoft. The 220-thread count of bamboo fibers is the equivalent in softness to a pillowcase made with a 500+ thread count of cotton fibers. The 100% all natural bamboo fibers, infused with essential oils, create a spa-quality, anti-microbial, hypoallergenic, and all-natural experience for the user while sleeping. Users have reported that the Nufabrx Pillowcase provides them with a calmer, deeper sleep.

Nufabrx representatives say that one of the leading causes of acne is sleeping on dirty pillowcases. Because they are often exposed to contaminants in the air, they can easily pick up germs, bacteria, and other harmful toxins that could be damaging to the skin. Many dermatologists recommend that people with acne problems wash their bed linens on a daily basis, which can be a challenge for people who live busy lives. The Nufabrx solution was to develop an anti-microbial product that eliminates the challenges of dealing with bacteria that may accumulate on a regular pillowcase.

Since its introduction to the market in 2012, the Nufabrx pillowcase has been gaining in popularity. Users have commented on how soft and comfortable it is to sleep on, and many claim to have seen a significant improvement in their facial blemishes with regular use.
