

Oregon Company Offers Best Lawn Sprinkler In Amazon

November 01, 2016

November 01, 2016 - PRESSADVANTAGE -

Oasis Ahead is a new brand in garden care and the company has recently rolled out its first product series that focuses on sprinklers and accessories. Products from Oasis Ahead can be found on the Amazon marketplace and the newly released sprinkler has been considered to the best in its category.

The company's website, which can be seen at oasisahead.com, offers a look at the first in their line of sprinkler products, the K-200 Lawn Sprinkler. The K-200 sprinkler gives lawn owners a number of benefits, according to company spokesperson Martin Holst.

"It's definitely the best sprinkler you've ever tried, and has an adjustable watering angle of up to 360 degrees," Holst says. "You don't get that degree of watering with just any old sprinkler. We've put a lot of time and effort into ensuring that this is the last sprinkler you will ever need." Holst adds that the sprinkler offers a long range pulsating water feature, and comes with a detachable shut off valve as well as a metal base that is weighted for stability.

Holst says, "The best part of this new sprinkler is the testing. We've put it through rigorous testing to ensure

that it offers the sprinkling capacity that you need." These tests, according to the company, are done under various different water pressure conditions, so those who know their home's water pressure capabilities can determine just how much sprinkling area it will provide them. The company offers a table on their official website to show the coverage areas depending on the specific water pressure of each home.

In addition to the sprinkler, those who visit Oasis Ahead's website will find a number of instructional videos on how to use the sprinkler, as well as various parts and accessories for the K-200. Holst states that this is definitely not the last product that the company will offer, but did not mention when the next product will be released.

Those interested can see the sprinkler in action through the videos on the company's official website, or visit their seller's page on the Amazon marketplace. Interested homeowners can also connect with the company via their website to stay updated on any new products that they plan to roll out in the future.
