

Crane Business Solutions Now Offers New Franchises For Limited UK Territories

October 19, 2016

October 19, 2016 - PRESSADVANTAGE -

Michael Crane, the founder and owner of Crane Business Solutions, based in London, is now making Crane Business Solutions franchises available in the UK.

Crane invested much time and effort in putting the systems and processes into place that make the back office of Crane Business Solutions easy to run. In fact, the system allows him to access business critical information from anywhere, even from a beach on the other side of the world.

When he opened his new showcase office in Sandwich on the Kent coast last year, he implemented all the systems from day one. "It was amazing how easy it was to run the new office from the start," Crane said, "It allowed us to work from a clean desk right away - and there was no hunting around for files and folders."

When he saw how well his processes and systems worked, he decided to create a franchise and make his business and systems available to franchisees. The systems will make their franchises very easy to run and suitable even for entrepreneurs who want to get started with a new business but are not quite ready to strike out completely on their own.

The new Crane Business Solutions franchise offers a tested business model, ongoing help, and, of course, that ready-made back-office support system. All the franchisees need to do is find new customers and sell their products, and they can hire a sales person for that.

Crane chose to focus on office products (initially) and then expanded to a comprehensive range of business solutions because every office needs these products and goes through them quickly. This means that they will have to replenish their supplies. Coupled with their superior customer service, this attracts plenty of repeat business.

Unlike the products of many other franchises, particularly in the fast food industry, business products are not perishable. Says Crane, "Our Crane franchise offers the best of both worlds - our products "run out" and need to be replenished, but we don't have to worry about them actually going bad and having to be thrown out."

Some potential franchisees have asked if it would be possible to run a Crane franchise as a part-time business. And Crane asserts that this is indeed an option, and could even be run from someone's kitchen table.
