Healthy Clean Pet Announces Milestone For Dog Detangler

October 26, 2016

October 26, 2016 -

Tucson, Arizona based company Healthy Clean Pet has announced that their natural dog detangler has been very well received since its initial launch onto the Amazon marketplace. The company states that their product has hit nearly 100 positive reviews on the marketplace. An important reason for its popularity is that the detangler can be used on dogs before brushing to help detangle hair and protect the coat.

"It's important to use a dog detangler on dogs before brushing them," explains Gustavo Guerra with Healthy Clean Pet. "When dogs are not washed frequently, a leave in conditioner can help to protect the dog's coat from a number of issues."

Guerra points out that if pet owners have a dog that hates bath time, the detangler provides an excellent alternative to fighting over the water. The conditioner can be sprayed onto the dog's coat after or even between baths to help protect against dry skin and to keep the coat healthy and shiny. More about this and other products offered by Healthy Clean Pet can be seen on their official website at <https://healthycleanpet.com/>.

"This aids with the brush out process and adds moisture into the coat. Most of these can be used on a wet or dry coat," Guerra says. "You can also use a leave-in conditioner between baths, to help detangle coat and moisturize the skin of your pet."

The detangler, which can be seen on the Amazon marketplace at <https://www.amazon.com/Detangler-Leave-Conditioner-Dogs-Cats/dp/B01184V0X2/>, is manufactured with ingredients that are safe for pets according to the company, so pet owners can use it without worries of irritation or skin issues.

Guerra states that the leave in conditioner and detangler is a good way for pet owners to avoid the hassle of bath time on a more regular basis. He states that frequent bath times can be cut in half, using the conditioner in between to help protect the dog's skin and smoothen the hair.

The company provides a wide range of pet products, all of which are considered safe for dogs. Pet owners interested in learning more or those who would like to connect with the company on Facebook and learn about upcoming product releases can like their official page at <https://www.facebook.com/healthycleanpet>.
