Whitening Dog Shampoo Helps Keep Dogs' Coats Healthy And Shiny

November 17, 2016

November 17, 2016 -

Dogs and cats with white or very light coats often end up having a dirty, yellow shine due to environmental pollutants. It is important, therefore, that their owners treat them with a whitening pet shampoo. Tucson, AZ business Healthy Clean Pet, has announced that they have been enabling pet owners to do this in a healthy, natural way thanks to their whitening shampoo, available through <https://www.amazon.com/Dog-Shampoo-Whitening-Smelling-Healthy/dp/B0170VDJD6/>.

"Because white hair in pets can easily turn yellow or beige, it is important to maintain it properly," says Healthy Clean Pet's Gustavo Guerra. "Our dog shampoo has been specifically designed for white hair, using all natural ingredients to leave the coat shiny, white, and healthy."

One of the things that truly sets the shampoo apart is that it is made up of all natural ingredients. It is quite common for whitening shampoos, particularly those of lesser quality, to contain harsh bleaching chemicals. These chemicals can cause sores on an animal's skin, as well as leaving their coats patchy and in poor overall condition. In all of Healthy Clean Pet's products, only the highest quality, natural ingredients are used. This is a commitment that they have made very clear on their website at <https://healthycleanpet.com/> and

something that has made them very popular.

Gustavo Guerra adds: "We want to make sure that pets look as beautiful and healthy as possible but without doing any damage to their health. In fact, we aim to improve their overall health through our products. This is why our whitening shampoo and all our other products are made up of natural ingredients only."

The formula used in the whitening shampoo has been scientifically developed in a world class laboratory by renowned experts on pet skin and coat care. The formula is exclusive to Healthy Clean Pet and they have ascertained that it is effective and delivers excellent results. The shampoo also smells great, which means it deodorizes the dog, while at the same time cleaning its coat and moisturizing its skin. Videos have also been released on the company's YouTube channel at <https://www.youtube.com/channel/UCQ7Igh0YsPgFBpvLcRS0tBg> to best explain how to use the products.
