

# Entrepreneur Kyle Campbell Releases Interview Video

*October 24, 2016*

October 24, 2016 - PRESSADVANTAGE -

Kyle Campbell offers training and promotional materials about online marketing, entrepreneurial techniques and search engine optimization. His recent video features an interview about his latest project.

Kyle Campbell is pleased to announce the release of his latest interview and video about a product he has used to increase his scope of operations and income. The podcast and interview were conducted by Daryl Rosser, who operates a six-figure SEO business, primarily for local clients. During the course of the interview, Kyle revealed how he uses foreign affiliate SEO to reach a one million dollar revenue figure. Campbell previously operated under the pen name Dan Anderson working with the Source-Wave community.

In the interview, viewers will learn how Kyle increased his earning levels by ten-fold per month. He describes how to choose offers and niches to enter which show the best likelihood of success. Another bit of information is a description of the only countries where it is profitable to enter as an affiliate SEO. Finally, he explains how to find inexpensive PBN content for foreign markets.

The explosion in profits which Kyle experienced, according to the interview, ?blew up almost overnight. I was involved in sites which went from a hundred dollars daily to about a grand a day on a consistent basis. Some briefly brought my earnings to more than a \$100,000 monthly.?

The principles and practices of utilizing foreign affiliate are of two major types. The first is English-speaking geographical areas such as the United Kingdom, where it is possible to dominate the dot net, dot com, and dot org websites. The second group of sites is those which not utilize the English language. He specifically names sites in Brazilian Portuguese and French.

Sites such as Upward which feature freelance writers are utilized to obtain quality content for the foreign language websites at competitive, even cheap rates. He also describes the change of tactics which occurs once the sites begin to rank. The switch to English is even less expensive for obtaining content, he says.
