

La Jolla Clinic Offers Top Urgent Care Facility

October 25, 2016

October 25, 2016 - PRESSADVANTAGE -

Medical Care San Diego offers walk-in patient care for many medical services needed in the La Jolla location. Expert medical care for lab tests, physical exams, illnesses and injuries is provided with minimal wait times.

La Jolla CA: Medical Care San Diego and Dr. Peter Mann are pleased to announce that they have been named the top facility for urgent care in La Jolla. The wait time is ensured to be fifteen minutes or less in order for patients to receive the needed help as soon as possible. Each patient is seen by the doctor, not by a nurse or MA. Dr. Mann is Board-Certified in Emergency Medicine to provide the best response for the many services needed by patients at the walk-in clinic.

The service list includes lab tests, physical examinations, illnesses, and injuries. The list is constantly expanding so that the doctor can help with many types of medical needs. The short wait time and experience of the doctor helps patients to receive prompt and expert care so they can return to their daily lives as quickly as possible.

According to a spokesperson for the clinic, "If you need a physical, we can help you get it done quickly. We offer pre-surgical, return to work, teacher, child care or school personnel physicals. We are available for school, pre-employment, college, driver's license and insurance physicals, as well as others. Our clinic offers a wide range of lab tests; many are done right on site with same-day results."

Injuries come in all sizes and levels of severity. When the injury or illness is nonlife-threatening, patients can often find much faster help toward recovery at the clinic, rather than with a visit to a hospital emergency room. For incidents such as removing a splinter, abrasions, sprains and strains and wound care, the walk-in center provides solutions.

Rather than wait days for a scheduled visit to a primary care physician, the clinic can provide assistance for illnesses such as colds and flu, asthma and allergic reactions. Prompt response to urinary and bladder infections improves the rate of healing.
