

American Survival Magazine Releases New Book: Build Your Own Still

October 28, 2016

October 28, 2016 - PRESSADVANTAGE -

October 28, 2016; Boynton Beach, FL: Survivalist Magazine, the premier digital publication within the emergency preparedness industry, proudly announces the launch of a new book titled Build Your Own Still. This latest digital rendition represents CDI Publications, the parent company, in their continued efforts to employ an eco-friendly attitude by reducing carbon footprints and environmental impacts associated with the physical print publishing industry. Build Your Own Still, and other digitally rendered guides from Survivalist Magazine, are available through the Amazon Kindle store.

?In the aftermath of a collapse scenario, having fuel, and/or the ability to manufacture it, may make accommodating life a little easier,? states Tristan Trubble, author of the eBook Build Your Own Still. ?Conventional fossil fuel services may no longer be available, and the reserve resources will run dry within a few weeks, if not days. If you have a homestead somewhere and are living a self-reliant lifestyle somewhere, then manufacturing your own still to produce alternative fuels should be of interest to you.?

Published with flip book style formatting to incorporate a touch of familiarity with traditional physical print publications, Build Your Own Still discusses the legalities of owning and operating a moonshine making still,

as well as serious concerns to take into consideration before getting involved with building a still. Due to legal concerns this book does not provide explicit details or blueprints for manufacturing a still; however, it does share valuable insight that cannot be overlooked.

?Manufacturing moonshine is illegal without the proper permits and licenses,? states George Shepherd, founder and CEO of Survivalist Magazine. ?While we were unable to provide a detailed step by step DIY guide to assist interested parties in building their own still, we did want to share as much relevant and pertinent information as possible. It is our hope that this information will provide readers with direction for further individual research on the subject of building a still, as well as what they can be used for.?

Survivalist magazine, one of the most respected leaders in the emergency preparedness and disaster survival industry, strives to maintain daily contact with their fans, followers, and members through a variety of online portals, such as webinars, podcasts, summits, workshops, articles, white papers, emails, DIY projects, survival guides and new blog posts on Steemit.
