

Omega Body Blueprint: Review Examining John Romaniello's Fat Loss Program Released

May 21, 2015

May 21, 2015 - PRESSADVANTAGE -

Omega Body Blueprint promises to help people exercise and eat in a way that promotes good hormonal health and fat loss. It is meant for someone who can't pass that last milestone, lose the last little bit of fat, or get the body that they actually picture as they workout. This has caught the attention of HealthyandFitZone.com's Stan Stevenson, prompting an investigative review.

Our Omega Body Blueprint review shows that you get a blueprint that helps you take control of your hormones and force your body to burn fat instead of store it. The program will also give you the insight and routine you need to get your body working optimally for you, reports Stevenson. Anybody who has spent some time working out and getting into decent shape, but not great shape, will love this program because it is made for them. It is for anyone who is tired of wasting time, losing money and not getting the results they want.

Omega Body Blueprint consists of a unique Metabolic Resistance Training (MRT) program that includes 4 different types of training rather than just fast-paced training circuits. It also incorporates nutrition, intermittent fasting and cycling to have a positive impact. The program comes with a training manual, workout charts, a nutrition calculator and manual, a supplement guide and a quick start guide.

6 weeks of training included with the program to help you take the right steps every inch of the way. It works for women and men of any age. Learn how to get past your plateau no matter where you are stuck and double your results in half the time with the right exercises, says Stevenson. Lose the last little bit of fat from your lower back, thighs, and hips, tackle your trouble spots and get the body you want and take control of your hormones for better physical health that guarantees success.

Created by a trusted name in the fitness industry, Omega Body Blueprint teaches you how to exercise and eat in a way that supports good hormonal health, so that you find the success you crave. In this program, you are going to learn everything you need to know to move past plateaus, lose fat, gain muscle and keep the body you want for a lifetime. This will be the last training and diet program you ever need to buy and follow.
