

DenadaDance Toe Spacers Set Receives Positive Reviews

November 24, 2016

November 24, 2016 - PRESSADVANTAGE -

DenadaDance, a company in Minden, NV, has recently released a set of toe spacers. These have been designed to provide relief to people who suffer from common foot afflictions, including bunions, corns, hammer toes, and so on. The company has now announced that the product has received many positive reviews from happy customers.

"We are very happy to hear that people are so pleased with our toe spacers set of 4," says Elena Vera, manager at DenadaDance. "We were particularly delighted to hear of one woman who explained that she has bunions and arthritis, and was due to have surgery before she tried our toe spacer set and found so much relief that she no longer needed a surgical procedure."

The satisfied customer on Amazon is Judith Heald who said, "Yes, it took a little while to get used to spreading my toes as they should, but gradually I got to the point where I was uncomfortable without them. Results? No surgery and 95% reduction in pain..."

Elena Vera adds: "This is exactly what we hoped to achieve. Our feet are so important to us, and we often fail

to look after them properly. They carry us everywhere, and it isn't until something starts to hurt, reducing our quality of life, that we start to pay attention. Our spacers are designed to undo the damage that has been done, enabling people to regain their quality of life. And, once they do, they can ensure that they do not get back to the painful situation they were previously in."

The company is happy to note that they have received many other comments from satisfied customers. Ann in Duluth says, "I haven't felt discomfort with them at all." Charles A. Webb says, "I had used plain gel inserts, but these work better as it goes around the index toe and stays in place." Karen Anderson says, "These are delightful. Squishy and lightweight."

The DenadaDance toe spacers are currently exclusively available on Amazon. They come in a set of four, which is made up of two medium and two large spacers. They come with a loop so that they do not slip once they are put in place.
