

DenadaDance Hallux Valgus Corrector Becomes Best Selling Item

November 14, 2016

November 14, 2016 - PRESSADVANTAGE -

Minden, Nevada company DenadaDance is proud to announce that the DenadaDance hallux valgus corrector is now a best selling item on Amazon. They have received 105 positive reviews in total since the product was initially launched. Welcoming all types of customer feedback, the company has been very happy to hear from them.

"We obviously love to hear about what we are doing right but we want to hear about where we can improve as well," says Elena Vera from DenadaDance. "In fact, it is thanks to those who have left us less than positive reviews that we have been able to update the services received with our product, such as including a lifetime guarantee. On the other hand, the positive reviews really get us going because they show us that we are making a positive difference in the world."

In each of the 105 positive reviews, people mention similar things, mainly surrounding the comfort and effectiveness of the hallux valgus corrector. People have mentioned how easy they are to put on, and how comfortable they are to wear, even enabling some people to wear them 24/7. Most important, however, is the effectiveness that customers have praised. In the company website, one customer said, "My feet were killing

me today, and after only a trip to the store I decided to try these. I've had them for a while but didn't hold much hope. Instant relief. I wore them under some boots and had to go out again and for once in my life, my toes don't hurt."

"The fact that our hallux valgus corrector product has significantly increased the quality of life of so many people is more than we could have hoped for," adds Elena Vera. "We want to encourage people to properly look after their feet, so that they can be comfortable at all times. Our toe spacers help to achieve that, providing relief for hallux valgus, bunions, corns, hammer toes, and more."

Educating people about proper foot care has been demonstrated to be of particular importance. The feet are the least looked after and pampered part of the human body, despite feet being responsible for carrying a person's body weight all day long. DenadaDance aims to improve on this as much as possible.
