

DenadaDance Encourages Natural Bunion Pain Relief

November 18, 2016

November 18, 2016 - PRESSADVANTAGE -

Medical science is constantly advancing and providing new forms of treatment, medication, and surgery. While this is a good thing for those who need it, some feel that humans have lost touch with nature and natural forms of relief. A foot care company in Minden, NV, aims to change this through their toe spacers. The company has now announced that DenadaDance natural bunion pain relief has been found to be highly successful.

Elena Vera from DenadaDance says: "When we experience pain, we think nothing of going to the nearest medicine cabinet and taking some painkillers and anti-inflammatory medication. While this does treat the symptom of pain, it does not treat its cause. We forget that every ailment has a cause, and that this is what we should look at fixing. Our natural bunion pain relief is a simple toe spacer that ensures your toes are properly positioned, thereby avoiding issues such as corns, bunions, and hammer toes. There is no need for chemical drugs or painkillers."

The DenadaDance bunion pain relief set comes with four toe spacers, two of which are large and the other two being medium. In so doing, they have ensured that anybody is able to use the spacers to provide relief for their foot problems. Mochi Panda on Amazon says, "... it relieves the pain and swelling and I use it before working out because it makes my feet more stable and be able to endure a good Zumba workout which is a

lot of dancing."

"There is no reason why you should opt for big pharma products whenever you have the slightest ache or pain," adds Elena Vera. "Our toe spacer uses no drugs or chemicals, but simply keeps your toes apart at the right distance, so that their alignment can be restored. Some people have found relief in as little as 24 hours."

Bunion pain relief is a complex issue. At present there are no U.S. Food and Drug Administration registered painkillers that specifically treat foot problem like corns and bunions. However, the DenadaDance toe spacer is proving to be far more effective anyway, ensuring people can get the relief they need without having to turn to medication.
