

## **DenadaDance Helps People Regain Comfort With Bunion Cushions**

*November 21, 2016*

November 21, 2016 - PRESSADVANTAGE -

Bunions are common but very painful afflictions that can significantly reduce an individual's mobility and thereby their quality of life. Minden, NV business DenadaDance is therefore very proud to announce that their DenadaDance bunion cushions set has been very positively received by over 300 people. Customers have hailed the product's effectiveness, comfort, and durability.

Elena Vera from DenadaDance says: "Our bunion relief set comes with two big toe protectors and two toe spacers that help in the treatment of bunions. They are a universal size bunion shield and pad, which is the perfect aid for hallux valgus pain. We're very happy to hear that so many people have benefited from our product and we hope many more will follow suit."

The bunion cushions set provides pain relief and protection from bunions, particularly for the sensitive skin areas. Additionally, by wearing them, people may prevent the development of ugly and painful calluses on the bunion toe. The bunion pads are soft and stretchable, made from gel, which means they mold themselves to the natural shape of the toe.

The cushions also help to properly align the toe, while at the same time stretching overlapping and crooked toes. Elena Vera adds: "Our toe spacers have been designed to help wearers to train their ligaments and toe muscles. This will help them to make sure that their toes are always properly aligned, regardless of the time of day."

Many customers have expressed their appreciation by leaving positive reviews. One Amazon customer says, "I have noticed a large difference in my feet, mostly that I am able to walk pain free." Lola and Sebastian says, "I thought that an operation was in my future, but since I have been wearing these daily for almost two years, I am pain free." Libby says, "I have literally worn these out. I wear them all day and even at night with my socks on and they have given me relief I just hadn't found otherwise."

"We feel that, after wearing our bunion cushions set and spacers, people can once again return to hiking, running, or dancing," adds Elena Vera, "enabling them to get their life back. The pads will protect them from obstacles and enable them to improve their quality of life overall."
