

Oasis Ahead Announces Volume Purchase Benefits For Plastic Sprinkler Head

November 22, 2016

November 22, 2016 - PRESSADVANTAGE -

Oasis Ahead, a garden and lawn care company, has noticed that many people have purchased multiple units of their new A-250 plastic sprinkler head. This is due to the fact that people can connect multiple sprinklers to their sprinkler system. The company has therefore decided to announce a 10% volume discount when people buy three or more sprinkler heads on Amazon.

"The Q-250 fits not only the Oasis Ahead K-200 sprinkler but also all other sprinklers on the market with a 1/2" thread. This makes the Q-250 the perfect choice when replacing sprinkler heads in your sprinkler system, regardless of the brand. This is why many people have been buying several units at a time," says Martin Holst from Oasis Ahead. "Hence, we have decided to launch a 10% volume purchase discount. Simply enter OAQ25010 at checkout on Amazon.com to apply the discount."

The sprinkler head has been designed to fit all types of sprinklers with a half inch threaded sprinkler type. This includes tripod and spike stands. It can also be used as a spare part or replacement for various other sprinkler bases, including the K-200 Lawn Sprinkler by Oasis Ahead.

People can manually set the angle of the sprinkler, allowing for 0 to 360 degrees watering. Designed to be easy to use, it only has a single setting to change. This also allows for both short and long range distance control. In fact, people can adjust it to cover about 5,000 square feet, although this depends on external factors such as local water pressure.

"One of the things we have also aimed to do," adds Martin Holst, "is to improve the water coverage. This is why it is now possible for people to simply adjust the diffuser screw, thereby breaking up the stream of the water. Plus, it comes with a deflect shield as well as anti-back splash arm. This means that the spray pattern is greatly improved and the area coverage is maximized."

Considering the many advantages the product offers, it is no surprise that so many people are interested in it. And now that the company offers a volume discount, it has become an even more interesting gardening device.
