

Atlanta Company Announces Lifetime Warranty On Basement & Crawlspace Waterproofing

November 21, 2016

November 21, 2016 -

Blacks Waterproofing in Douglasville, Georgia, has recently announced that they are now offering lifetime warranties in any service that they provide, including basement and crawlspace waterproofing. The family owned and operated company states that they offer free estimates on all jobs that they undertake, and provide services in and around the Atlanta, Georgia area.

Andy Black, founder and owner of Blacks Waterproofing says, "Our aim at Blacks Waterproofing is and has always been to put our customers first. Since 1990, we have helped people throughout our area to protect their basements and save money in doing so."

Black says that their lifetime warranty is part of their overall customer satisfaction goal. He states that he recalls an incident recently where a customer called to have the company check out a wet spot on her basement carpet. He explains that this customer had previously called other companies, which are larger companies that are corporate owned. However, those companies simply tried to sell her basement

waterproofing services for thousands of dollars.

"Turns out she didn't need that service at all," Black states. "We took a look and found that her problem was actually a clogged drain in the condensation system for her air conditioner. We took the time to detect the actual problem, without merely trying to sell her something that she didn't need. This is the type of dedicated service we offer all of our customers."

Testimonials from this and many other satisfied customers can be seen on the company's website at http://blackswaterproofing.com/testimonials/. Black states that part of the reason they have become a popular service in the area is because they place their focus on customer need as opposed to profit. Being a small, locally owned company, he says, is what truly sets them apart from others when it comes to basement and crawlspace waterproofing.

Black urges homeowners in the area to contact Blacks Waterproofing when they suspect they may have a problem with basement leaks. He states that his company will take the time to determine the real cause of the problem, without merely trying to upsell customers into waterproofing that they may not need. More about the company and the services they provide can be seen on their official website at http://blackswaterproofing.com/.
