

American Survival Magazine Releases New Guide: Build Your Own Still

November 16, 2016

November 16, 2016 - PRESSADVANTAGE -

November 16, 2016; Boynton Beach, FL: Survivalist Magazine, the premier publication and most respectfully recognized name in the emergency preparedness industry, proudly announces the release of a new guide book by renowned author Tristan Trubble titled Build Your Own Still. As part of the company's ongoing efforts to reduce carbon footprints traditionally associated with the physical print industry, and to remain more environmentally conscious, this education rich resource is currently available on the Amazon Kindle store for immediate purchase and download. Customers may also order a physical print copy on demand through Amazon's Createspace company.

Moonshine making stills can be purchased prefabricated, or manufactured as part of a DIY project, explains Tristan Trubble, author of several emergency preparedness manuals, guides, and books. There are several reasons that individuals within the preparedness community may want to consider erecting a moonshine making still, especially if a total collapse of current infrastructures occurs. Moonshine, when made correctly, can be used as an alternative fuel source in vehicles that can run high octane. It might also be an item useful for barter in an after-collapse economy.

Previously published with flip book style formatting and offered digitally, this information and education resource is now available through Amazon Createspace, allowing customers to order a physical print copy on demand and consume the information in the style that serves them best. Author Tristan Trubble has assembled the content for Build Your Own Still and presented it in an easily understood and simple to follow format, guiding the reader from one chapter to the next. Readers will discover the intricacies of deciding to build a still, as well as topics that deserve serious consideration.

?Owning and operating a moonshine still is considered illegal in several states and countries,? states Trubble. ?That being said, in a disaster situation that results in the immediate lack of laws and rules, nobody will be coming after you or your moonshine still. While most people do not consider a moonshine still to be useful for modern day life, they may want or need this information in an after-collapse scenario. I keep an updated copy in my survival library at all times.?

Survivalist magazine, one of the most respected leaders in the emergency preparedness and disaster survival industry, strives to maintain daily contact with their fans, followers, and members through a variety of online portals, such as webinars, podcasts, summits, workshops, articles, white papers, emails, DIY projects, survival guides and new blog posts on Steemit.
