

No-Cavity Club Members Posted For This Month

November 21, 2016

November 21, 2016 - PRESSADVANTAGE -

Syracuse NY dental practice Smiles by Design offers cosmetic, family and sleep disorder dentistry to all age groups. Several new members of the No-Cavity Club have cavity-free check-ups to recognize.

Syracuse NY: Smiles By Design and Dr. Susan B. Dunn, CEO, are pleased to announce the addition of new members of their No-Cavity Club. The Syracuse dentist offers preventative dentistry as well as innovative restorative and fashionable cosmetic dental techniques, beginning with young children who are encouraged to form good oral health habits at an early age. Every patient is important and the latest advances in dentistry are combined with a unique personal touch.

"The Cavity-free Club is designed to help children learn and maintain top oral hygiene," according to a spokesperson for the practice. "We speak with the child about their brushing and flossing habits, and offer choices of fluoride flavor and toothbrush color. Each procedure is explained in order to encourage participation. Each child is provided with the opportunity to choose something from the Treasure Box at the close of the appointment."

She continues, "We enthusiastically celebrate great dental check-ups by maintaining the No Cavity Club Board with pictures of the best brushers and flossers. Each good checkup is marked by a new photo to allow the youngster to take home the image from the previous visit."

Additional dental services include a focus on cosmetic dentistry and sleep apnea therapy. Cosmetic dentistry treatments and methods include tooth whitening, porcelain crowns, dental implants, bridges, metal-free white fillings, smile makeovers, veneers, and Invisalign. Other dental and oral health services include family dentistry for children and adults , preventative dentistry, X-ray information, treatment of gum disease, oral cancer screening, one-visit all ceramic crowns, root canal therapy, implants and mini-implant placement to support dentures.

The importance of a pleasing smile cannot be overstated, Dr. Dunn says. It is typically the more dramatic and eye-catching facial feature. No patient has to settle for chipped, stained, poorly shaped or crooked teeth.

There are cosmetic dentistry choices that allow for confidence in the way the patient looks and feels.
