Wonderful Wags Launches New Treat Offerings For Pets

November 28, 2016

November 28, 2016 - PRESSADVANTAGE -

While many people have long kept pets as companions and for services, it hasn't been until recently that people have truly started to treat their pets as members of the family. People now dress their animals to make sure they are comfortable in the colder months, and they only accept superior quality food and treats to protect their animal's digestive system. Wonderful Wags, a dog treats company in Farmington, UT, is proud to announce that they are launching a new line of gourmet natural pet treats, featuring Bacon Maple Crunch Bones, which fit in perfectly with the modern dog owner's needs and requirements. The entire lineup of treats can be seen on the Wonderful Wags website or on amazon.

Renee Coulter from Wonderful Wags says: "We are so excited to be able to offer these new treats. Best of all, we have been able to get them out just in time for the holiday season, so that people's four legged friends don't have to go without presents either. As we always say: 'be the person your dog thinks you are and feed them only the best treats available'."

The new treats are available on Amazon, as well as on the Wonderful Wags website. The treats are made 100% in the USA, enabling the company to be sure that the quality is as high as it possibly can be, and that

the ingredients are natural, healthy, and safe. The treats have been slow baked for crunchy perfection.

Unlike many other dog foods and treats, the new treats are made with only the highest quality human grade ingredients. They have also used a gourmet wheat, corn, and soy free formula. This means even dogs with sensitive stomachs should be able to benefit from it.

"What we wanted to do was create something that dogs will love to receive and owners will love to give," adds Renee Coulter. "This is precisely why our treats are made of healthy, natural ingredients, unlike most other dog foods and treats that often use fillers and even DDD (dead, diseased, disabled) animals that otherwise should not have been slaughtered. DDD animals are frequently added to dog food, and this even causes them sometimes to inadvertently eat food that contain dog meat, interlaced with antibiotics."

For more information, pet lovers can also take a look at the Facebook page of Wonderful Wags.
